Introducing Univar Environmental Sciences

Mission

To aid and support our clients' in protecting their customers' communities, homes and quality of life, by helping keep their environments pest free.

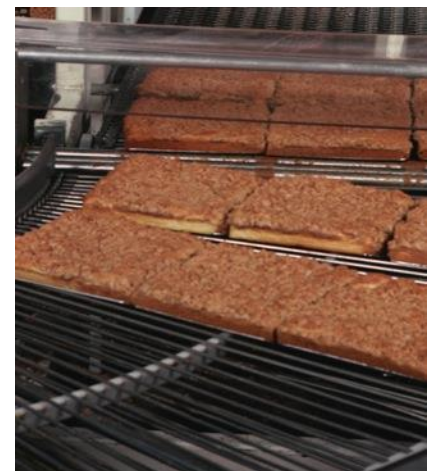

Our Commitment

Supplying the products and services to help you improve your customer's environments.

Markets

- › Structural Pest Control
- › Public Health
- › Turf & Ornamental
- › Hay Production
- › Food Processing
- › Post Harvest Commodity Storage
- › Animal Health

MANUFACTURER PARTNERS

- CENTRAL LIFE SCIENCES
- AMVAC
- SUMMIT CHEMICAL COMPANY
- CONTROL SOLUTIONS
- BAYER ENVIRONMENTAL SCIENCE
- SYNGENTA
- BELL LABS
- UNITED PHOSPHORUS (UPI)
- VALENT PROFESSIONAL PRODUCTS
- ZOECON

CURTIS DYNA FOG
LONDON FOGGERS

MasterLine Aqua Kontrol 30-30

- Uses leading edge technology to maximize cloud performance & efficacy
- Mixes Easily
- Stays in solution
- Simply add three 2.5 gallon jugs and top off 55 gallon drum to create a 4.1 product. It eliminates rinsate disposal issues and increases storage capacity
- Versatile – easy to apply by air, ground or handheld spray equipment
- Odor – No offensive odor
- Quick Knockdown - Relief starts in just seconds. Insects are both knocked down and killed.
- Non Corrosive - won't damage application equipment including aircraft, autos & pumping systems
- Broad spectrum - Effective against many species of Mosquitoes, Gnats, Flies and most Diptera.

MasterLine Kontrol 4-4

- MasterLine® Kontrol 4-4 for Mosquitoes, Flies, and Gnats is a 4.6% permethrin / 4.6% PBO low odor oil formulation that is ready to use and ideally suited for most areas over specific crops including alfalfa and range grasses.
- As a non-corrosive, it won't damage cars, trucks or airplanes.
- Versatile - Easy to apply by air and ground ULV, thermal foggers and by mist barrier applications.
- Low Odor.
- Elimination of the 100 ft water set back.
- Approved for treatment of corrals, feed lots, poultry ranges and zoos.

Univar is the exclusive distributor for LONDON FOGGERS

The London Fog model 18-20 provides superior results and a more accurate droplet spectrum when compared to other brands of similar specifications:

- much higher percentage of droplets under 20 microns than comparable competitors' units.
- results are more accurate and repeatable between tests
- vastly fewer large droplets which fall to the ground before impinging on a target species

Intelligent Design

Koehler engines are standard equipment – all Koehler engines are heavy duty, commercial grade units. 18HP units have hydraulically actuated lifters which are a superior design require less maintenance.

LONDON FOGGERS

- Belt driven units (18-20, 9-10, XKE) are rated for 27,000 hours of use, outlasting any competing direct drive unit.
- Engine-Blower ratio is 1:1.18 rather than 1:1 with direct drives, which extends blower/machine life.
- Pesticide pump comes with a 3/8” ceramic piston with carbon liner in pump head. Expensive but designed to last for years of use with harsh chemicals while providing higher flow rates when needed. Competing manufacturers use a 1/4” ceramic piston, limiting the flow rate and limiting the life of the piston and pump head.
- Highest quality components are use throughout the build.
- GPS London Flow Option components are sealed in a secure enclosure to eliminate the risk of contamination by solids/fluids.

LONDON FOGGERS

- Upright Pump Mount – Easy to reach/manipulate from side of spray vehicle. Orientation of pump and pump box means all fluids are easily drained and won't gather at bottom of housing, leaves the pump clean. Pump housing has a nice clean layout, no clutter inside.
- Individual components of the unit are easily accessible, no complex assemblies involved.
- Each design is field-tested extensively before becoming a part of their product line.

Customer Service

- The professionals at London Fog pride themselves on this aspect of their business model. It is rare that they cannot troubleshoot and rectify problems over the phone. They do everything within their power to get users back up and running with one phone call and believe that happy customers grow their business.

PestWeb®

The industry's leading pest management resource

- › The latest industry news, events, information, and classified ads.
- › Featured products and manufacturers as well as current promotions.
- › Product training videos.
- › Useful pest information, news, and links to help with control techniques and anything pest-related.
- › Ask Mr. Pest Control – Fire questions at the expert 24/7 and get direct responses.
- › ProTraining allows for CEU training for recertification, online, at your and your employees convenience.

PestWeb.com and Premier Services

Product Documents and Information Database

- › Find products by name, pest, site, manufacturer, or product category
- › Cross-references with available MSDS'and labels
- › Time-saving product flags for label and MSDS updates by email

PestWeb.com and Premier Services

Pest ID and Weed ID

- › Outstanding image library for identification
- › Updated information on pests, weeds, and how to control them

Ask Mr. Pest Control Archive

A complete, easy-to-use archive of past questions.

TVMCC HOGTOBERFEST

- › October 2015 TVMCC Meeting sponsor.
 - › Equipment Winterization workshop
 - › Latest Health and Regulatory updates
 - › KCBS Award winning BBQ luncheon provided by Lil ol Me.
-
- › Took 6th place in Virginia State Championship in Bluemont VA in 2013.
 - › Took 5th place award in Virginia State Championship in 2014
 - › Look for us May 9th Fredericksburg VA. 2015 Barbeque State Championship. Fredericksburg Barbeque Jamboree.
