

Container Breeder- Artificial

- *Aedes albopictus* aka: “the Asian Tiger”
- Established across entire US
- Most problematic species
- Difficult to control-breeds in natural and man-made containers
- Truck spraying not very effective
- A sit and wait predator-not always on the wing
- Throax with narrow medial white stripe
- Tarsi banded

Container Breeder- Natural

- *Ochlerotatus triseriatus* aka: “tree hole mosquito”
- Breeds in tree holes but can be found in artificial containers
- Distinct flattened abdomen
- Thorax mostly dark on top- sides with silvery scales
- Tarsi not banded

Container Breeder- Natural and Artificial

- *Ochlerotatus japonicus*- “rock pool mosquito”
- Proboscis entirely dark
- Thorax brown with longitudinal lines
- of golden scales
- Banded tarsi
